Professional Summary

Software Engineer in Test with 2+ years of experience in backend, API, web, and mobile test automation. Proven track record in validating complex booking, payment, and payout systems with cross-system data verification. Experienced with event-driven AWS architectures, CI-integrated automation frameworks, and Agile delivery. Focused on reliability, scalability, and production-grade quality assurance.

Work Experience

Software Engineer in Test May 2025 – Present
Drive lah *Remote*

- Conducted backend and API testing across booking, trip lifecycle, payments, and payouts; validated pricing, discounts, credits, fees, and recalculation logic for bookings, modifications, and extensions.
- Executed end-to-end payout pipeline testing covering creation, execution, reconciliation, and payment state transitions including multi-currency and regulatory compliance scenarios.
- Performed cross-system data validation across Sharetribe Flex, internal data pipelines, and backend services to ensure consistency and integrity.
- Validated AWS event-driven workflows by analyzing Lambda logs, DynamoDB records, and message queue consumer processing.
- Investigated production issues through structured log analysis using Sentry and AWS Lambda logs, API tracing via browser DevTools Network tab, and cross-system data comparison with SQL queries.
- Built and maintained automation frameworks using Appium (mobile) and WebdriverIO (web) for critical user and admin workflows.
- Enforced regression coverage, designed complex manual test scenarios, and supported release readiness activities.

Salesforce Developer May 2024 – January 2025
TwinForce Solutions Limited *Dhaka, Bangladesh*

- Developed and customized Salesforce UI components to enhance user interfaces and streamline booking workflows.
- Designed and maintained test scenarios and test cases for the Promotions Module, ensuring robust regression coverage.
- Executed exploratory and regression testing across sandbox and production deployments.
- Wrote Apex test classes to automate validation for multiple business-critical Salesforce classes.

QA Automation Engineer Intern December 2023 – April 2024
a1qa *Remote*

- Developed automated test scripts using Selenium WebDriver, Java, and TestNG to improve regression coverage across web applications.
- Integrated automated test execution into CI/CD pipelines to support efficient release cycles.
- Introduced BDD using Cucumber and Gherkin to improve test readability and cross-team alignment.

Technical Skills

Testing: Manual Testing, Functional Testing, Regression Testing, API Testing, Database Testing, UAT, Performance Testing
Automation Tools: Selenium WebDriver, Appium, WebdriverIO, Playwright
Frameworks & Reporting: TestNG, Cucumber (BDD), Mocha, Allure
API & Performance: Postman, Newman, JMeter
Observability & Data: Sentry, Browser DevTools (Network Tab), SQL, AWS Lambda Logs
Cloud & Infrastructure: AWS Lambda, DynamoDB, S3
DevOps & CI/CD: Git, GitHub, Jenkins, CI-integrated Test Pipelines
Project Management: Jira, Trello
Programming Languages: Java, JavaScript, Python
Concepts: SDLC, STLC, OOP, Root Cause Analysis (RCA)

Projects

Drive lah | *Backend, API, Payments & AWS Testing*

- Tested end-to-end booking, payment, and payout workflows; validated pricing logic, fee calculations, discount application, and payment state transitions.
- Validated AWS event-driven architecture including Lambda functions, DynamoDB records, and message queue processing to ensure distributed system integrity.

Drive Mate | *Car-Sharing Platform QA*

- Executed functional and regression testing across booking, trip lifecycle, and payment workflows for a peer-to-peer car-sharing platform.
- Performed cross-system data validation to verify consistency between frontend, backend, and third-party service integrations.

Education

BRAC University
B.Sc. in Computer Science *Dhaka, Bangladesh*
